

# cellZscope<sup>®</sup> – Compatibility With Cell Culture Inserts

All cellZscope systems are compatible with a variety of standard cell culture inserts from different manufacturers. Three versions of cellZscope electrodes are available, which are tailored for use with small, mid-sized, or large inserts, respectively. If required, different electrode sizes can also be combined in a single Cell Module. The lists below show some of the compatible inserts.

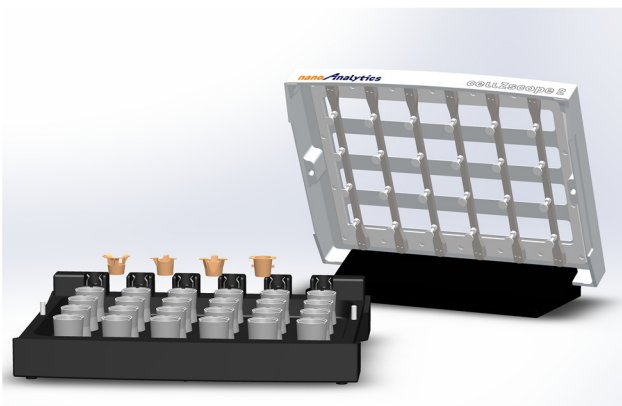

### "24-Well" Type Inserts
